

How to edit the Bottango File

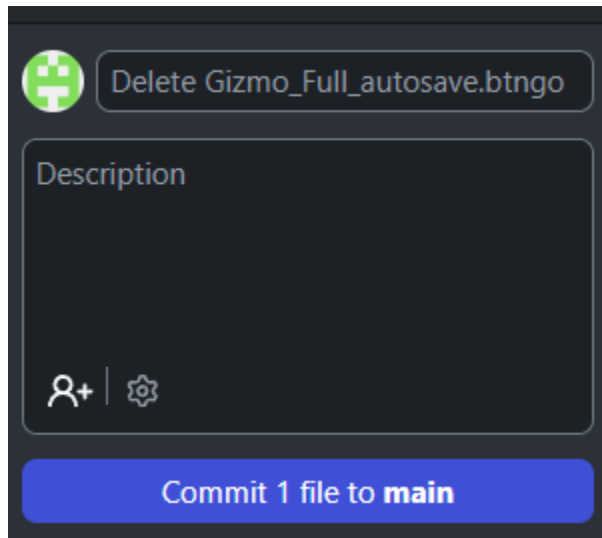

Once the file is downloaded, open it in a text/code editor (you can right click the Gizmo_Full file and click "Edit in Notepad" and that'll work) so that you can see it formatted like this, and then change line 16 to wherever you have the center plate assembly downloaded

```
Gizmo_Full.btngo

Next, open the file in Bottango to make sure that the model is visible like this

Once you've finished making any changes open Github, then click "Commit # file to main" and include a small description of what was changed

Finally, to push the changed file to the online repository, click push origin
